

How to use the printable ring sizer

Print this page and carefully cut around the ring sizer's dotted lines.

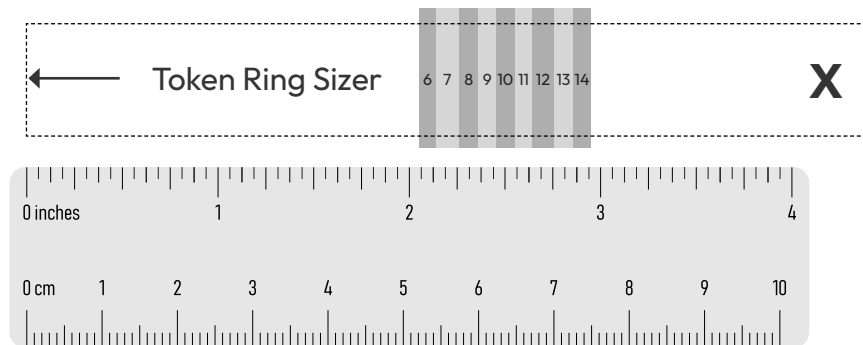

Hold, or tape, the end marked "X" to the finger you plan to wear your ring.

Wrap the paper around your finger till the arrow meets the printed sizes (6-14).

Check where the end of the arrow meets the size. When in doubt, select the larger size.

Please verify you are printing at 100% scale. Print actual size. No scaling, fitting, or stretching. To determine if your sizer is printed accurately, check against a ruler after printing on paper.

Tips for an accurate Ring fit:

1. Once wrapped around your finger, tape the sizer with sticky tape and be sure you can slide it up and down your finger.
2. If you have large knuckles, measure around the knuckle instead of the finger base.

This document is formatted for Letter paper size.

If you are printing on a different paper size, the ring measurements may be inaccurate. To ensure accuracy, print at 100% scale (actual size) and use the correct paper size for your region.
